

# The Declaration on Environment

## Basic Principle

Sunrise Seiko recognizes that preservation of the global environment is an essential and common human problem. We aim to reduce everything that can bring environmental footprints.

## Policy

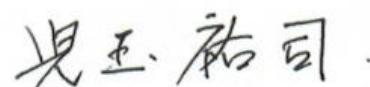

Sunrise Seiko Inc. aims to harmonize with the global environment by managed activities. We are under this policy in all our departments and in all our facilities, from the production to the services.

1. Our company constantly recognizes environmental effects of our activities, products and services. We want to prevent the pollution of the environment and we want to work for continued improvements of the environmental management. It includes the sustainable usage of resources, reduction of footprints and adaptation towards climate change.
2. We follow the law and other required environment rules which apply to our activities, products and service.
3. We work on the following items that are important themes in environmental management that affect on our activities, products and service.
  - (1) to reduce electric consumption.
  - (2) to cut tools expendables.
  - (3) to rise environment friendly activities.
4. We make our employees sure to allow this policy contract to be shown and obtained by everyone.

In order to achieve the policy, we target and progress our Environmental Management activities, which are periodically revised.

Established: 1st of October 2007

Revised: 15th of September 2015
